

Oluwatosin Ayomide Aborishade

Design Engineer

Lagos, Nigeria | +2348066414560 | mosestosyn07@gmail.com | [LinkedIn](#) | [Contra](#) | [Portfolio](#)

PERSONAL STATEMENT

Design Engineer with 3+ years of experience owning the full product pipeline, from Figma to shipped application. I bridge design and development, eliminating the handoff gap by building what I design using Bubble, Webflow, Flutterflow, and custom code. I've shipped products across AI/wellness, fintech, fashion, and services, helping founders and businesses move from idea to live product faster — without the translation loss that comes from separating design from engineering.

WORK EXPERIENCE

Codeless Solutions

Ilorin, Nigeria

Design Engineer

August 2025 – Present

- Lead end-to-end product development of DreamAI, an AI wellness app integrating Azure OpenAI's GPT API for intelligent dream analysis and personalized insights.
- Design and build all core Bubble workflows: dream submission, API orchestration, and user data processing — from concept through to deployment.
- Architected scalable database structures with parent-child relationships, privacy rules, and secure workflows to protect sensitive health data.
- Delivered a fully mobile-responsive interface, positioning DreamAI as a pioneering no-code AI solution in the wellness space.
- Collaborate with cross-functional teams to define product requirements, ensuring usability, accessibility, and scalability across the platform.

Codeless Solutions

Ilorin, Nigeria

Software Engineering Intern

January 2025 – August 2025

- Redesigned BL Bookings and Songpact in Bubble, improving visual consistency and overall user experience for both platforms.
- Led end-to-end design and development of a web app marketplace — from wireframes and style guides through to a fully functional Bubble build.
- Created and applied design systems and component libraries across multiple projects, maintaining brand alignment and reducing inconsistencies.
- Collaborated with the project manager and team lead to ensure all stakeholder requirements were accurately reflected in final deliverables.

Jrun Global

Lagos, Nigeria

Product Designer

October 2024 – December 2024

- Built cohesive design systems and comprehensive style guides to ensure visual consistency across the web application.
- Designed responsive user interfaces optimized for seamless experiences across desktop, tablet, and mobile devices.
- Ensured full compliance with WCAG accessibility standards, improving usability for all users including those with disabilities.
- Created intuitive, user-centred designs serving both returning users and first-time visitors — balancing aesthetics with low learning curves.

Starr Power Technologies

Lagos, Nigeria

UI Designer

December 2023 – June 2024

- Designed aesthetic and functional user interfaces for multiple client products in collaboration with the design lead.
- Built responsive web applications that met both client specifications and end-user needs across various screen sizes.
- Developed component-level design systems that improved consistency and reduced design-to-development friction across projects.

SafeSpace

Lagos, Nigeria

Product Designer

May 2022 – September 2022

- Designed the company's complete style guide — including colours, typography, and component layouts — reducing the developer handoff process by 70%.
- Created wireframes, prototypes, and visual designs that effectively communicated product direction to cross-functional stakeholders.
- Collaborated with cross-functional teams to deliver user-centred designs aligned with business goals and customer needs.

Apretio

Lagos, Nigeria

Product Designer (Contract)

January 2022 – March 2022

- Adapted web application layouts for mobile compatibility without compromising functionality or user experience.
- Prototyped and tested mobile versions to ensure consistent and performant experiences across all devices.

Douglo Technologies Ltd

Lagos, Nigeria

Web Development Intern

May 2020 – December 2020

- Assisted with frontend development using HTML5, CSS, jQuery, and Bootstrap.
- Supported backend development tasks using PHP and managed client website hosting via cPanel.

SPEAKING & WORKSHOPS

Introduction to No-Code: Building with Bubble

2025

60-minute workshop delivered at KwaraBuild 2025, covering no-code fundamentals and practical Bubble development for a live technical audience.
